CALL FOR PAPERS

Multimedia big data analytics
Distributed multimedia for body networks
Deep learning for health-specific event detection and classification
Streaming, security and privacy for healthcare
Sparsity-based and low-rank based sensing of human vital signs
Multimedia for smart homes and elderly care
Multimedia processing for tele-rehabilitation
Computational imaging for healthcare applications
Healthcare monitoring applications using wearable technologies
Image/video/speech/audio coding and processing
Multimedia networking
Multimedia traffic, communications and heterogeneous interactions
Multimedia quality assessment
Internet of Things (IoT)-based multimedia systems and applications
Multimedia hardware design
Augmented, mixed and virtual reality
Acquisition, Storage, Retrieval and Display
Computer Vision Processing and Analysis
Information Forensics and Security
Biomedical Signal Processing
Applied Signal and Speech Processing
Emerging Technology
